SIZE CHARTS- APPAREL

CHOOSING THE RIGHT SIZE

Measurements refer to body size, not garment dimensions, and are in inches unless otherwise noted. When choosing sizes, height and weight are most important. We provide age as a rough guideline.

HOW TO MEASURE HEIGHT

Stand with feet slightly apart, without shoes, and back to the wall. Measure from the top of the head to the floor.

BETWEEN SIZES

In cases where your body measurements are in between two sizes, we recommend you choose the smaller size for a tighter fit and the larger size if you prefer a looser fit.

PANT FIT

If your body measurements for hip and waist result in two different suggested sizes, we recommend choosing the size that matches to your hip measurement.

TOP FIT

If your body measurements for chest and waist result in two different suggested sizes, we recommend to order the size that matches to your chest measurement.

MEN'S TOPS

CHEST

Measure around the fullest part of your chest, keeping the measuring tape horizontal.

WAIST

Measure around the natural waist (the narrowest part), holding the tape measure horizontally.

HIPS

Stand with your feet together and measure around the fullest part of the hips, holding the tape measure horizontally.

MEN'S BOTTOMS

WAIST

Measure around the natural waist (this is the narrowest part), holding the tape measure horizontally.

HIPS

Stand with your feet together and measure around the fullest part of the hip, holding the tape measure horizontally.

INSEAM

Measure from the top inside leg to the bottom of your leg, be aware measurements are based on regular inseam.
